

World Edit

- Create massive structures in game

Multiverse Core

- Run multiple worlds on one server. (Ex: creative world, skyblock, factions, etc)

Essentials X:

- A must have. Gives you all the commands you would expect from a minecraft server.
 - [Lucky Perms](#) (Create admin and mod permissions for different levels of op like Mod/Admin)
 - [Vault](#) (for displaying in chat prefix/suffix titles of op levels like "Mod", "Admin", "Owner")

BlueMap

- [Demo World](#)
- Google maps for minecraft,
- shows live players too
- Accessible in web browser

Papermc, bukkit, and spigot share majority of the plugins.
